*(up to two non members per member can be booked at members' rates)*

**Reply by:** 10<sup>th</sup> February 2012

**This workshop is aimed towards competent grafters – those who play a major role in grafting on the nursery and who want to advance their knowledge and growing skills.**

It will not be a practical session honing grafting skills with the knife as participants should have these skills already.

It will be an interactive half-day of intense learning with Chris, looking at the vital aspects of rootstock selection and handling and sourcing of scion material. It will also be an opportunity to look at the methods he uses in the production of 1 year old pot-grown grafts of a range of deciduous trees and shrubs.

He will also discuss other grafting techniques he has used or seen being used during his career in plant propagation and education.

There will be an opportunity to look at his extensive collection of plants housed on 7 acres of land.

Participants are asked to bring a notebook. Tea and coffee will be provided but please bring your own lunch.

***Priority for places will be given to IPPS members***
